

Introduction

Enables revision comprehensive data reporting. Input fields with different labels can be merged together in the result.

Field| Description|

Label	Title of this report.
Column Definitions	Columns reaching across reports. Format: { Column = Original Columns; ... }

Felix Biler: Bitte Bild ohne Weitere Eigenschaften, da die in diesem Fall irrelevant sind
René Bock: ist gefixt

Carrying out Revision-Overarching Analyses

- By means of the button *generate report* a CSV file that summarizes revision-overarching results is generated. The time frame can be set using From To (the latter values are not persistently saved.)

Paragraph can be inserted in

- [Questionnaire Revisions](#)

Possible Representation Forms

- No representation for end-customers
